## ABOUT ME

I am proactive, motivated and responsible with the roles assigned to me. I have good interpersonal skills, and I like dynamic activities that challenge me to get out of my comfort zone.

## EDUCATION

|                                                                                            |                                |
|--------------------------------------------------------------------------------------------|--------------------------------|
| <b>University of Porto – FEUP</b><br><i>M.Sc. in Artificial Intelligence</i>               | Porto, Portugal<br>2026 – 2028 |
| <b>University of Porto – FEUP</b><br><i>B.Sc. in Informatics and Computing Engineering</i> | Porto, Portugal<br>2022 – 2025 |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                    |                                       |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|
| <b>IAM Engineer – Trainee</b><br><i>MC Digital - Sonae</i>                                                                                                                                                                                                                                                                                                                                         | 2025 – 2026<br><i>Porto, Portugal</i> |
| <ul style="list-style-type: none"><li>Developed connectors for automated provisioning flows, with Role-Based Access Control (RBAC) and Oracle stack</li><li>Configured authentication and SSO federation using SAML, OIDC, Microsoft Entra ID and Active Directory</li><li>Integrated apps in a custom internal Java web application built for access request management, with REST APIs</li></ul> |                                       |
| <b>Research Intern – LLM-Based Autograding</b><br><i>DEI, FEUP – University of Porto</i>                                                                                                                                                                                                                                                                                                           | 2025<br><i>Porto, Portugal</i>        |
| <ul style="list-style-type: none"><li>Developed a Django autograding system to evaluate open-ended student responses against configurable rubrics</li><li>Implemented asynchronous LLM processing with Celery and Redis to handle concurrent evaluation workloads</li></ul>                                                                                                                        |                                       |
| <b>Teaching Assistant – Compilers</b><br><i>FEUP, University of Porto</i>                                                                                                                                                                                                                                                                                                                          | 2025<br><i>Porto, Portugal</i>        |
| <ul style="list-style-type: none"><li>Assisted Java lab classes on compiler construction and translation to intermediate and assembly representations</li></ul>                                                                                                                                                                                                                                    |                                       |

| <ul style="list-style-type: none"><li>Developed a prototype for improving emergency medical services through remote pre-triage</li></ul>                          |                |

## TECHNICAL SKILLS

**Languages:** Java, Python, C/C++, SQL, JavaScript, PHP, Haskell, Assembly, VBA  
**IAM & Identity:** Oracle OIM, Oracle OAM, Microsoft Entra ID, SAML, OIDC, SSO, Apigee  
**Frameworks & Tools:** Django, Laravel, React Native, Node.js, Git, Postman, Bruno, Jasmin  
**Concepts:** Identity Governance, Access Reviews, Role Management, REST APIs, Active Directory

## LANGUAGES

**Portuguese:** Native | **English:** Fluent – C1 (IELTS 8.0) | **Mandarin:** Intermediate (HSK 3) | **German:** Basic
