ABOUT ME

I am a proactive and motivated engineer, who thrives in collaborative environments and is always looking for new challenges. I am deeply committed to working on meaningful projects that create a positive impact in society.

EDUCATION

University of Porto – FCUP <i>M.Sc. in Artificial Intelligence</i>	Porto, Portugal 2026 – 2028
University of Porto – FEUP <i>B.Sc. in Informatics and Computing Engineering</i>	Porto, Portugal 2022 – 2025

EXPERIENCE

IAM Engineer <i>Growin (at Sonae MC)</i>	2025 – Present Porto, Portugal
- Developed connectors for automated provisioning flows, using Java, based on Role-Based Access Control (RBAC) - Configured authentication and SSO federation using Microsoft Entra ID and Oracle's Access Management. - Integrated apps in a custom internal Java web application built for access request management, via REST APIs	
Research Intern – LLM-Based Autograding <i>DEI, FEUP – University of Porto</i>	2025 Porto, Portugal
- Developed a Python system to evaluate open-ended answers against configurable rubrics, using Django framework - Implemented asynchronous LLM processing with Celery and Redis to handle concurrent evaluation workloads	
Teaching Assistant – Compilers <i>FEUP, University of Porto</i>	2025 Porto, Portugal
Assisted Java lab classes on compiler construction and translation to intermediate and assembly representations	
AI Trainer <i>Outlier AI</i>	2025 Remote
Fine-tuned AI LLMs - evaluated model responses, wrote prompts and wrote ideal completions on C++ content	
Software Engineering Intern <i>OPT – Optimizações e Planeamento de Transporte</i>	2024 Porto, Portugal
- Implemented RAPTOR algorithm for multimodal transport journey planning in official metro and bus networks - Worked with large-scale data structures and applied performance optimization techniques in C++	

PROJECTS

BookSwap <i>React Native, Expo, Node.js, PostgreSQL, Prisma, Firebase Auth</i>	2026 – Present
Development of a mobile app; responsible for architecture decisions, database schema, and feature planning	
Generative AI Recipes Chatbot <i>Python, RAG, FAISS, LangChain</i>	2025
Built a personalized chatbot using Retrieval-Augmented Generation architecture; part of a Deloitte's GenAI course	
Travelling Salesperson Problem <i>C++</i>	2024
Implemented Ant Colony Optimization and multiple heuristic approximations for the TSP	
HealthTag <i>Hackathon Finalist – TecStorm 2024</i>	2024
Developed a prototype for improving emergency medical services through remote pre-triage	

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, PHP, Haskell, Assembly, VBA
IAM & Identity: Microsoft Entra ID, Oracle's Identity and Access Management, SAML, OIDC, SSO
Frameworks & Tools: Django, Laravel, React Native, Node.js, Git, Postman, Bruno, Jasmin, Apigee
Concepts: Identity Governance, Access Reviews, Role Management, REST APIs, Active Directory

LANGUAGES

Portuguese: Native | **English:** Fluent – C1 (IELTS 8.0) | **Mandarin:** Intermediate (HSK 3) | **German:** Basic
